DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15 and 21-23 drawn to a driver, classified in class 327, subclass 333.
- II. Claims 16-20 and 24, drawn to a power converter, classified in class 323, subclass 315.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the power switch may be referenced to a potential other than five volts. The subcombination has separate utility such as a driver for an I/O switch.
